

DataFlight Europe A/S Environmental Policy

Our policy is closely linked to the Canon Group's Environmental Charter. It reflects Canon's business operations and the environmental impact we have in Europe.

Corporate philosophy of kyosei

To achieve corporate growth and development while contributing to the prosperity of the world and the happiness of mankind.

DataFlights environmental philosophy

In line with the kyosei philosophy, we pursue maximisation of resource efficiency and contribute to the creation of a society that practices sustainable development.

The Fundamental principles for DataFlight Europe's Environmental Assurance

We seek to harmonise environmental and economic interest related to all business activities and offering products with lower environmental impact through innovative improvements in resource efficiency.

The fundamental principles will be supported by the following:

1. Establish and operate an environmental management system in order to improve our environmental performance.
2. Raise the environmental awareness of our employees and encourage them in taking initiatives in environmental protection.
3. In purchasing resources, give priority to materials, parts and products with lower environmental impact.
4. Operate in accordance with environmental laws as well as upholding Canon Group environmental assurance agreements.
5. Seek to minimise waste and promote recycling, as well as reducing energy consumptions and harmful emissions.
6. Encourage an environmentally conscious disposal of our products at the end of lifetime.
7. Maintain close relationships with governments, communities and other interested parties.

September 2011

Jesper Schultz
Managing Director
